Atari 800/XL/XE
Software Catalog

Loading Programs

There are two types of programs for the Atari 8-bit computers. The first kind are BASIC programs. These programs have the extension of .BAS. To load, place the disk label-side up into your disk drive, close the latch, and turn on the computer. Atari 400/800 owners must have the BASIC cartridge installed; XL/XE owners have BASIC inside their machine automatically. If a menu is displayed on the screen, type the number next to the program to run it.

Binary files usually have the extension .COM, but occasionally end with .EXE or .OBJ. To load, place the disk label-side up into your disk drive and close the latch, and turn on the computer. Atari 400/800 owners must have no cartridges installed; Atari XL/XE owners must hold down the OPTION key while turning on the computer to disable BASIC. If a menu is displayed, type the number next to the program to run it.

You may find that not all binary programs will run from the menus (most notably some utility programs). To load these, load DOS 2.5 into your machine (DOS 2.5 was included when you bought your disk drive, refer to your owner's manual for details). When the menu comes up, remove the DOS disk and put the disk with the program you wish to load into the disk drive. Type 'L', and hit RETURN. The program will now ask for a filename. Enter the filename, and hit RETURN, and the program will load. (For example, if you want to load SUPRBOOT.COM, hit 'L', RETURN, then 'SUPRBOOT.COM' and RETURN.) For a list of the filenames on your disk, type 'A', RETURN, RETURN, from the main menu of DOS 2.5.

Many programs have documentation files included with them. These typically end with .DOC, but sometimes end with .TXT as well. To view these, one thing you can do is buy a special program, like a documentation viewer utility or a word processor, such as Textpro (see Disks # 220/221) You can load and view documenation files with these programs, and with a word processor and a printer, you may print the documentation files as well.

You may also view and print .DOC files from DOS 2.5. Load DOS and put the disk with the .DOC file you wish to view in the disk drive. Type 'C', and RETURN. Type the filename of the .DOC file, then ',E:', RETURN to display it to the screen. To pause and continue display to the screen, press the CONTROL and '1' key simultaneously. To print the file, hit 'C', RETURN, the filename, ',P:', and RETURN.

If you have an XL or XE computer, you may need a Translator Disk (# 217) to load and run some of the programs. If a program fails to load, try loading the Translator Disk first. We have tried to note which programs in our catalog required the Translator, but there may be others and you may have other programs that would work on your computer with the Translator.

We also have a Software/Accessory catalog for the
# Atari ST

Atari 800/XL/XE
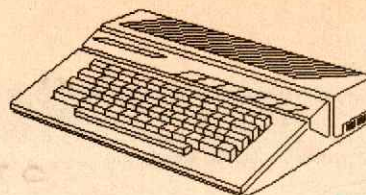

Public Domain and Shareware Software

1-4 Disks	$3.99 Each	
5-14 Disks	$3.49 Each	
15+ Disks	$2.99 Each	

Utilities

Disk #42
Turbo Basic
100% compatible with Atari BASIC, runs Atari BASIC programs 2-4 times faster. Programs compiled in Turbo BASIC can be executed as fast as 15 times faster than before! Documentation and demo programs included. Further documentation is on Disk #73. (Requires 64K)

Disk #45
130XE Utilities
Programs that take advantage of the added capabilities of the 130XE: WEDGE130, RAMXE, XEBAS, XELATOR, RAMCOPY, COPY130, PIC130, and more.

Disk #62
Graphic Operating System
G.O.S. is a desktop program similar to those found on the Atari ST and Macintosh computers. Uses the joystick instead of a mouse. Sample programs included on the disk can display Koala, MicroPainter, and Graphics 9 pictures.

Disk #71
CAD XE
Computer Aided Design package for the XE computers.

Disk #73
Turbo BASIC Documentation
More detailed and extensive documentation for Turbo BASIC. Viewing program included. A printer is recommended but not required.

Disk #75
PACE Disk Labeler
Make your own disk labels, supports different label sizes and printer types.

Disk #96
Electronic Checkbook
Balance your checkbook easily. Loads needed programs into a RAM Disk for extreme speed. (Requires 128K)

Disk #103
Disk Base
A complete disk cataloging program for the Atari. Written in machine language for speed.

Disk #115
Labeling Programs
Print disk labels, VCR labels, mailing labels, disk jackets, and more on your Epson or compatible printer.

Disk #126
Mail Pro
Stores up to 700 names, addresses, and phone number, to disk.

Written in Turbo BASIC for speed. Printer recommended but not required. (Requires 64K)

Disk #127
Car Help
Keep track of car repairs, fuel economy, and information on your car(s).

Disk #128
Astronomy Programs
Includes Halley's Comet Tracker, Observational Astronomy Program, Horizon Coordinates Calculator, Star Encounters, Planetarium, Astron II, Solar System, Weather Forecast, Hurricane Location Calculator.

Disk #129
Ham Radio Utilities
Includes Automorse, Orbit Predictions, Antenna Calc, Electrical Formulas, Resistor Decoder, Yagi Calculator, Small RF Coil Winter, L-C Circuit Calculator, Attenuator Pad Designer and Minimuf.

Disk #139
Weekly Scheduler
Allows you to schedule your week ahead, then print out to a printer.

Disk #142
MACH DOS
A powerful replacement DOS for 2.5. Ease of use makes it recommended for novices.

Disk #156
ComDOS V3.1
Operating system similar to MS-DOS for the 8 bit.

Disk #171
DOS XE
Developed by Atari in 1988, this DOS has several new features over DOS 2.5, includes date stamp to disk (for those with clock/calendars) and displays file length in bytes instead of sectors. Uses extra memory in the 130XE. Computers with 48K and 64K can still use DOS XE and take advantage of the new features.

Disk #172
Graph XY
Lets you create X-Y graphs and view them to the screen or print them to a printer. Documentation included.

Disk #174
Atari View 8 V2.0
Shareware GIF Viewer. Allows the Atari 8 bit computers to display GIF pictures from other computers. Now you can view pictures from the Atari ST, Amiga, IBM, and Macintosh. 3 GIF pictures and full documentation is included on disk.

Disk #183
Script 80 V2.0
An 80 column word processor for your XE! Documentation included. Text may be unreadable or hard to work with unless you are using a monitor, rather than a TV. Requires the translator for use on XL/XE machines.

Disk #200
BASIC Utilities
BASIC RECOVERY PROGRAM - A utility which can be accessed within other programs which loads information from a cassette recorder
HEADER - Tells whether a file is a BASIC program, machine code, or text
HOME INVENTORY - A home inventory tracking program
PROGRAM LISTER - Prints any listed BASIC program to your printer in a readable format
THE LOCKPIK - A sector copier
MINITERM - Small terminal program to use with your modem. Requires handler file specific to your modem.
MINI UTILITY - Utility that formats and copies disks
OUTPUT - Subroutine for use in your own programs for interesting text output
SNAIL 1.0 DISK DRIVE TACHOMETER - Measures the RPM of your disk drive
TAPE DUPLICATOR - Copies a program on one cassette to another.
TEXTEDIT - Simple text editor
TELEVISION ALIGNMENT - A collection of 8 patterns to test the alignment of your television
ULTRADUP - Modifies your DOS 2.5 DUP.SYS file to set unverified disk writing, among other options.
VOICE I/O - Allows you to talk through the TV's speaker via the computer. Requires a custom-built circuit (diagram included)
SCROLL - Demonstration of an upward scroller
HEXPAD - Creates line numbers and DATA statements automatically for inputing data for programs.
MATT EDIT V13.0 - Simple text editor. Accepts inverse and control characters
ZPLOTTER - Plots 3D graphs. Contains options to print and save displayed graphs
PTRFONT - Edit, load, and save fonts which can then be downloaded to the Gemini 10X printer
HEXPOKE - Memory dump and editor in hexadecimal notation

Disk #201
BASIC Utilities
AMODEM 4.2 - Terminal program with file transfer capabilities. Documentation included
CLOCK - Displays a clock in the corner of the screen
COMPUTE - Computes interest rate, number if payments, etc. about loans
DISK DOCTOR - Fixes corrupted files
RPM - No frills speed tester for your disk drive
FINANCIAL CALCULATION - Computes financial calculations for investment and borrowing
MINCOMP3 - Demonstration on how to print to the screen by directly poking into screen memory
MULTICOLOR GRAPHICS GENERATOR - Demonstrates the ability to display 16 colors on the screen at once in graphics mode 0
SOUND GENERATOR - Allows you to experiment with sounds by entering pitch, volume, distortion, and loops
GRAPHIC WINDOWS OF TEXT - Demonstration of text in different graphic modes
NEWXL - Takes binary programs that don't work on the XL and fixes them. Program is not guaranteed to work for all programs
HOME FINANCE MANAGER - Keeps track of home budgets
HOTSTUFF - Shows the directory in alphabetized form
CONVERT 3 - Converts files on a DOS 3.0 diskette to a DOS 2.5 disk. Documentation included
SCREEN PRINT - A screen dump routine for Epson, Centronics, and C-Itoh printers
BANNER 80 - A banner printing program for 80-column printers

Disk #202
BASIC Utilities
AUTOFILE - Creates AUTORUN.SYS file from BASIC

statements you enter
BUSINESS - A series of business calculation programs, including amoritization table, depreciation schedule, savings & loans, "what if?" mortgage comparisons, monthly bar graph, and much more
CARTCOPY - Copies a cartridge to a disk file. Works on the Atari 800 only
CHECK DEBUGGING AID
COPYALL II - Creates a two-pass copying program on a blank, formatted disk
ATARI COPY V1.2 - Copies a single file to another disk
DISK DETECTIVE - Searches for an ASCII or hex string within a given number of sectors on your disk
EXTENDED BASIC - Creates an AUTORUN.SYS file that gives you extra BASIC commands useful for programming. Documentation included
GEMSET 3.0 - Control code setup program for the Gemini 10X printer
EPSON FX-80 FONT MAKER - Edit, load, and save fonts which can then be downloaded to the Epson FX-80 printer

Disk #203
BASIC Utilities
ALTERDOS - Alters your DUP.SYS file so that any file matching the filespec A*.SYS will be treated as AUTORUN.SYS
BUDGET - Budgeting program
CROSSREF - Creates a cross-referencing file from your BASIC program
DISK CATALOG - Keeps a log of the files on your disks, and has a file finder to search for a specific file
DISKSCAN - Utility which allows you to scan and modify the disk in character and hexadecimal. Also disassembles sectors, and assembles into sectors
DISKTEST - Tests your disks and disk drives
DOSMASTER - Allows you to copy files from one density to another with a single disk drive
GRAPH E'S FORMATTED PLOT PROGRAM - Prints graphs of the sine wave, parabolas, circles, or your own custom plot to your printer
INVEST - Determines the value of an investment with the factor of inflation built in
KEYCLICK - Creates an AUTORUN.SYS file which eliminates the keyclick noise
HUMOR DOS - A DOS menu with a sense of humor
DOWNSIDE - Flips the entire screen upside down

Disk #204
BASIC Utilities
WEEKLY-MONTHLY BUDGET
CHECKBOOK BALANCER
CREATOR - Creates a listed BASIC program from an object file which, when run, recreates the object file
DIETY - Creates a listed BASIC program from a series of sectors in memory which, when run, recreates that section of memory
DIGITAL CLOCK - A LCD-like display clock that also has an alarm
DIRECTORY PRINT - Prints the directory of the disk to your printer
DISPLAY LIST LISTER - Lists the display list instructions for various graphic modes
CREATE-A-FONT - A font editor for the standard Atari font. Fonts created can be used with many other programs that use the standard font
HEX/DEC CONVERSION - Converts hexadecimal numbers to decimal, and vice versa
LABEL IT - Prints the directory of a disk to a label
PRINT DISK LABELS - Allows you to print DOS disk labels and manual labels. Accomodates several sizes of labels
ATARI-EPSON BASIC PROGRAM LISTER - Prints program listings to any Epson printer. Prints control characters
LIST MEMORY LOCATIONS IN DECIMAL
ALPHADIR - Prints disk labels alphabetized by columns
PROGRAM LISTER
PATTERN MAKER - Generates repeated patterns from user created designs
BARCHART - Sample program and subroutine for producing a bar chart
BOOTABLE CASSETTE TO DISK XFER - Transfers an auto-booting cassette to an auto-booting disk

PS LABEL MAKER - Print labels with Print Shop graphics and various fonts. For Epson, Gemini, and Prowriter printers

Disk #205
BASIC Utilities
CALENDAR - Displays a calendar from any month of any year
QUICK SORT - A quick sorting routine for use in other programs, twice as fast as bubble sort
SECTOR CHECKER - Checks your disk for bad sectors
SUPER INDEX - File indexer which keeps track of which files are on which disks. Includes a printing program, to print your database of files
FLICKER - Demonstration of graphics flicker
MSG MESSAGE EDITOR - An editor for making ATASCII cartoons
ALPHDUMP - Dumps a page of memory to the screen
BESTAUTO - Creates an AUTORUN.SYS file which allows you to run a BASIC program, boot the 850 interface, set fast cursor mode, or any combination of the three
TRACE - A tracer utility for your BASIC program
RENUMBER - Will renumber statements within a BASIC program to a given starting number and increment
SUPRCOMP3 - Compares two LISTed files together, and creates a third file which contains all of their differences
RAMTOP - Lets you know how much memory display poke statements are using
TIMER - Timing routine
MORE READ TIME CLOCK

Disk #206
BASIC Utilities
WYTRAGOF LISTER - Prints LISTed BASIC files that contain inverse and control characters
JOYSTICK TESTER - Tests joysticks hooked up to all joystick ports
LABEL MAKER - Prints labels in letter quality and expanded text. Configured for Epson printers, although it can be changed to work with any printer
DISK DOWNLOAD THROUGH MODEM
KOALA PAD PICTURE PRINTER - For Epson, Gemini, NEC, and Prowriter printers. Docs included
PURGE - A quick file deleting program. Comes in handy when several files need to be deleted from the disk
SUPERFONT+ - A font editor program. Many features, such as reverse, invert, scroll, and support for Antic modes
WHEELS - Draws graphic designs based on the coordinates you input. Has the ability to print out and save the image created
THE COMPACTOR DETECTOR - Detects whether a disk file has been Scrunched, Mashed, Shrunk, or Crushed
DISK CLONE - Disk duplicator
WEDGE - Creates an AUTORUN.SYS file which, when loaded, adds several features to BASIC. Documentation included.
GR8PRINT - Demonstration on how to print text while in graphics mode 8
THE COMPACTOR - Takes a BASIC program and compacts it to use as little memory as possible to run

Disk #207
BASIC Utilities
PLAYER/MISSLE DESIGN AID - A designer for Player Missle objects. Calculates the data needed for the input for the object
PLAYER/MISSLE GRAPHICS UTILITY - A construction set for setting up PM data
8 demonstrations of PM animation
FAST SCAN FOR THE MPP - War Games dialer for the MPP modem
THE PROTECTOR - Modifies your program so that it cannot be listed by anyone else
DISKOVERY - A sector dissector and utility
ART SHOP - Allows you to delete Print Shop graphics, convert Print Shop to Micro-Painter format, Micro-Painter to Print Shop, and rename Print Shop files. Docs included
BAD SECTOR - Searches for bad sectors on your disk and numbers them
DOCREAD - Documentation reader

Disk #208
BASIC Utilities
PERSONAL PROGRAM LIBRARY - A cataloging utility for disks
SUPERCOMP - Compares two list-file versions of the same program, and generates a list file of the differences
DISK RX - Includes a broken file builder, undelete files, and a sector directory
BINARY-LOAD-DISK TO BOOT-TAPE - Copies a binary load file on a disk to a self-booting tape
GEMINI 10X LABEL PRINTER
MEMORY DUMP - Dumps pages of memory to screen or printer
MULTI-COPY - Use joystick to select files to copy, for 1 or 2 drives
RAINBOW PRINTER - Prints a text file to your Okidata color printer. Allows for single color or multiple colors
CAESAR'S CLOCK - Displays a digital clock in Roman numerals
ATARI-SKETCH-PAD - A drawing progam operating in graphic mode 7. Draw, fill, load, and save functions
SOUND EFFECTS - A collection of 9 sound effects for use in your own programs
SYNTAB - Creates a cross-reference file for a LISTed BASIC program
TAPEDUMP - Does a hex and decimal dump from a cassette file to the printer
DOT-CROSSHATCH - Used to test TV alignment
GTIA COLOR ALIGNMENT PROGRAM - Displays bars of GTIA color for aligning your computer
FIELDSORT - Sorts fixed length strings
ASSEMBLER ENTRY - Allows machine code to be directly input to memory
DISASSEMBLER - Disassembles sections of memory

Disk #209
BASIC Utilities
POLYCOPY - A sector copier
READ-A-FILE 3.0 - A utility for viewing terminal program buffers which have been saved to disk
PSEUDO-DOS - All of the standard disk functions offered by DUP.SYS in a BASIC program
SCREEN READER - Demonstration of an input command that will input an entire screen of text
BACKWARDS DEMO - Demonstrates the ability to invert the Atari font
DECIMAL TO BINARY CONVERSION - Converts numbers from decimal to binary and vice versa
ERROR - Shows how to simulate an error within your program
DATAMAKE - Useful for inputting DATA statements in your own programs
DAYOWEEK - Enter a date, and it returns the day of week the date fell on
SORTOUT - Compares two programs, and lists their differences in a separate file
DATABASE FILE SYSTEM - Database that keeps track of the files on your disk
DISK FORMAT AND VERIFY - Includes the ability to change directory sectors and write DOS to disks
ALARM CLOCK
BACKUP - Backs up floppy disks to cassette
SHELL SORT - Demonstration of a shell sort routine
RAMEDIT - Creates a binary file which is a copier/sector editor that takes advantage of the extra memory in the 130XE. Req. 128K. Documentation included
ASSEMBLER TO BASIC UTILITY - Merges an assembly program with a BASIC program. Documentation included

Disk #210
Teacher's Aids
GRADEBOOK - Enter names and grades of students and store them on disk for future reference and printing. Computes final grades
TEACHER'S AIDS - A series of 10 programs designed for keeping track of students grades. Includes graphing and printing features

Disk #211
Menu Programs
14 different BASIC menus. Choose your favorite menu and install it on your disks! Also included are four programs that create binary load menus.

Disk #212
Binary Utilities
BOOTDISK & BOOTFILE - Convert a boot disk into a series of files that can be sent over the modem. Also converts the file created back into a boot disk
QUIKCOPY - A sector copier. Has the option to copy the entire disk or specific sectors
CODEBUSTER! - A full-featured disassembler. Docs included
SECTOR COPIER - A two-pass disk copier
GAMEBOX - Creates colorful rainbow menus for binary disks. Req. Translator on XL/XE
QUICK MENU MAKER - Creates a binary load menu within the boot sector of your disk. DOS is not required to run the menu
BASIC TOKEN DECODER V1.1 - Translates a SAVEd BASIC file that has been protected from others viewing it. Requires Translator on XL/XE
BOOT-LOAD FILE CONVERTER - Converts a boot disk or cassette to a disk file. Requires Translator on XL/XE

Disk #213
Binary Utilities
CARTRIDGE COPY - Copies cartridge to a disk file. Requires Atari 400/800
DUPLICATE ANY DISK UTILITY
RAMTEST - Tests the RAM in your computer
SHRINK II - Shrinks and unshrinks disks to send over the modem. Works in single and double density
SUPERDUPER - Sector copier
SUPERKEY & KEYEDIT - A macro-key creator. Saves keystrokes for often used commands. Documentation included
DE-REZILYZER - Converts a Koala picture into an ATASCII text file
THE REPAIR STATION - Repairs BASIC saved files that will run but not list. Requires Translator on XL/XE
SUPER BOOTDISK - Converts a boot disk to a file for transfer over a modem. Also converts files created back into boot disks
CARTRIDGE COPIER - Copies a cartridge to a disk file. Requires Atari 400/800

Disk #214
Binary Utilities
SCRUNCH II/DISCOMM 3 - Two compression programs to convert an entire disk to a series of files to send over the modem.
ARC - File ARCer, compressing files to approx. 70% of their original size, for transfer over a modem, archival storage. ARC format is the same as those found on the Atari ST, IBM PC, etc.
ARCX - Used to uncompress ARC files to their original size
SUPERUNARC - Uncompress ARC and ALF files.

Disk #215
Binary Utilities
THE DIS-KASSEMBLER - A sector editor, assembler, and disassembler. Works with single and double density disks
GLUE - Several utilities in one: Glue and UnGlue, view ARC and ALF files, and more. Best when used with SpartaDOS
ALFCRUNCH - File compressor for transfer over a modem, archival storage. Faster than ARC
B-CALC - Spreadsheet program, similar to Visicalc. Documentation included
BRODERBUND UNPROTECT - Makes backup copies of Broderbund software

Disk #216
Binary Utilities
BINARY LOAD COMPRESSOR - Compresses the file size of binary files, which saves room on your disk. Compressed files can still be run normally. Documentation included
DATASET UTILITY DUMP - Prints any file, section of memory, or disk sectors, to the screen or printer in hexadecimal format. Works with single and double density disks. Requires Translator to work on XL/XE. Documentation included
PROBJ - Takes a DOS binary file and outputs a RAM map and a compressed load file. Documentation included
SHADOW - Disk copy utility unique in that it can copy a single density disk to a double density disk, among normal disk copying. Requires Translator on XL/XE. Documentation included
BINARY FILE LOAD ADDRESS SCANNER V1.3
DSPLOAD - Displays information about DOS load files

SYNCOPY - Sector copier. Copies 1050 enhanced density disks as well as single & double density disks

Disk #217
Translator/Emulator
For XL/XE computers. Allows you to run 99% of software that won't run on your XL/XE that normally runs on the 400/800 computers.

Disk #218
Turbo BASIC 48K
Turbo BASIC for the Atari 800, which speeds up operation of BASIC programs up to 5 times faster. Requires only 48K of memory.

Disk #219
Copymate 4.3
One of the best sector copiers available. Supports warp-speed of US Doublers and Happy drives. Supports extra memory of 130XE and memory upgrades (up to 256K). Copies single and double density disks.

Disk #220/221
Textpro 4.0M
The best Public Domain word processor for the Atari XE. Takes advantage of the features of MyDOS 4.5. Documentation included. Explains all features of the program in a clear, easy-to-read format.

Disk #222
Chick Scratch V5.9
Shareware word processor. Has many of the features of a full-fledged word processor. 64K is recommended but not required. Documentation included.

Disk #223
MyDOS 4.5
This DOS leaves DOS 2.5 in the dust. It is 99% compatible with DOS 2.5, and includes added features such as up to 1 Meg RAMdisk, double density, and hard drives. Includes full documentation.

Disk #224
MyDOS 4.5 Technical Documentation
Technical documentation explaining all of the calls to MyDOS, what they do, and how to use them. Also included are technical notes on RS232, VTOC, and more. For the experienced programmer.

Disk #225
DOS 4.0
This DOS was released by Atari in 1984. It is compatible with double density drives as well as single and enhanced densities. Utilities are included to convert files from DOS 2.0 and 3.0 to DOS 4.0 disks. Help system provides on-screen documentation.

Disk #226
Checkbook Balancing System
Use your computer to keep track of your checkbook.

Disk #227
General Ledger and Spreadsheet
A double entry balanced accounting system for the Atari. Full manual and tutorial is included. Knowledge of general accounting principles are required. A Gemini 10X or Epson printer is required to print out the documents.

Disk #228
Family Finance
An easy-to-use family budgeting program. Includes a graphing program, and a module for printing.

Disk #229
Micropaint Painter
A complete drawing package. Includes several sample pictures. Documentation included.

Disk #230
R-Draw
A powerful drawing program using graphic mode 8 for high resolution drawing. Stores pictures in standard 62-sector format. Includes documentation and sample pictures. Requires 128K.

Disk #231
Draw7 V2.0
Complete drawing/animation program. Animation shower is included on the disk. Requires 128K.

Disk #232
Draw7 V2.0 Documentation
Full documentation for the Draw7 drawing/animation program.

Disk #233
Title Screen
Lets you create a title screen for your BASIC programs. Unique functions include large letter type and the ability to autorun your program after displaying the title screen

Disk #234
Font Master
Allows you to print a text file in a different font. 44 fonts are included on the disk, and since the program uses the standard Atari format of font, many more are available. Also includes a sideways printer for Syncalc spreadsheet files. For use with the Epson FX and Gemini 10X printers.

Disk #235
Sage Cat Disk Catalog Manager V1.1
A disk cataloging program from the Atari Users Group in Erie, PA. Unique options include printer output for disk jackets, labels, disk inserts, as well as standard and extended reference guides. Requires 64K.

Disk #236
The Works
A typesetting program for the XL and XE computers. Requires a Star NX-10 or compatible printer.

Disk #237
The Reformatter
Takes text files and reformats them to a set margin and line length, then saves the new file to disk. Useful for modifying text files received from other types of computers to 40 column output for the XE. Requires 64K. Documentation included.

Disk #238
In Touch
A complete telephone/address database. Allows you to look up, edit, and print entries. Documentation included.

Disk #239
Various Printer Utilities
PRINT UTILITY FOR SYNFILE+ - Prints labels 1, 2, or 3 across with any Synfile+ data file. Documentation included
NICELIST, THE ULTIMATE PROGRAM LISTER - Prints out any BASIC program, including control characters. Two versions are on the disk - One which prints to Epson and Gemini printers, and another which prints to NEC 8023 and Prowriter printers. Documentation included.

Disk #240
Digital Editor
Desktop Publishing on the Atari. Create your own flyers with numerous fonts and pictures. Program is difficult to use, so it is only recommended for those familiar with the Atari computer. From Germany. Requires 64K.

Disk #241
Digital Editor Pictures
Pictures for use with the Digital Editor.

Disk #242/243/244
Learning to Program in Atari BASIC
If you've ever wanted to learn to program, this set of tutorials can make you a pro! Teaches all of the basics about the language, as well as a few advanced concepts.

Disk #245/246/247
Atari 8-bit Reference Manual
Covers the advanced topics of programming on the Atari 8-bit computer. Deals with advanced BASIC programming, as well as programming in 6502 assembly language. For the advanced programmer, only!

Disk #392
Binary Utilities
YET ANOTHER UUENCODER/UUDECODER - These programs are used to convert 8 bit binary files to 7 bit text files and back again. Used to communicate with USENET and other 7 bit systems. Documentation included.

Modem Programs

Disk #85
Amodem V7.5
Amodem V7.5 with handler for the Atari SC212 modem. Other modem types may use the program, providing you have the correct handler program.

Disk #114
SX-212 Express!
The best terminal program is now compatible with the SX-212 modem.

Disk #143
DeTerm
Terminal program which can be used with any modem, provided you have the correct R: Handler. A "Break Out" game is built in which allows you to play while uploading or downloading a file. Documentation included.

Disk #248
Express! 850
A terminal program for modems using the 850 interface. Easy-to-use interface and machine language speed makes it a favorite for many. The terminal program by which all others are judged by.

Disk #249
Express! 1030
Same as Express! 850, for the Atari 1030 and XM301 modems.

Disk #250/251
PC Term
Terminal program for both the SX-212 and modems which use the 850 interface. Requires two disk drives, or one disk drive with a RAM disk. SpartaDOS is recommended but not required. Documentation included.

Disk #252/253
Oasis BBS
Excellent BBS program for the 850 interface modems. 2 disk drives are strongly recommended for use, but not required. Documentation included.

Disk #254/255
Chameleon Terminal Emulator
An all purpose terminal program that supports 850 interface modems as well as the Atari 835 and 1030. Includes such features as 80-column display, VT-52 emulation, and Kermit file protocol. Documentation for the Chameleon Terminal Emulator is written for the beginner. Reader/printer program included on disk.

Printer Programs

Disk #44
Daisy Dot
This program will produce near-letter quality output from your saved documents without hardware modification on your Epson, Star or compatible printer. Includes a variety of printer fonts and complete doumentation. (Requires 64K)

Disk #69
Billboard Printer
Prints Micropainter, R-Draw, and Computer Eyes pictures in any size, from wallet size to as large as several feet and more! For Epson and compatible printers.

Disk #74
Daisy Dot II
Produces near-letter quality output from your saved documents without hardware modification on your Epson, Star or compatible printer. This version includes an expanded font library, bold, emphasized and justified print.

Disk #83
Sign Maker
Mix up to 3 Print Shop icons and 2 fonts on the same page! (Requires 64k)

Disk #97
Daisy Dot Fonts
46 additional fonts for use with either Daisy Dot or Daisy Dot II.

Disk #102
Dot Magic
A Daisy Dot compatible program which has all of the features of Daisy Dot II, with the ability to add pictures anywhere in your document. Epson or compatible printer required. Documentation included.

Disk #325
Print Shop Graphics
Was previously Disk 12, Side A.

Disk #326
Print Shop Graphics
Was previously Disk 12, Side B.

Disk #327
Print Shop Graphics
Was previously Disk 18, Side A.

Disk #328
Print Shop Graphics
Was previously Disk 18, Side B.

Disk #329
Print Shop Graphics
Was previously Disk 19, Side A.

Disk #330
Print Shop Graphics
Was previously Disk 22, Side A.

Disk #331
Print Shop Graphics
Was previously Disk 22, Side B.

Disk #332
Print Shop Graphics
Was previously Disk 150, Side A.

Disk #333
Print Shop Graphics
Was previously Disk 150, Side B.

Disk #334
Print Shop Graphics
Was previously Disk 151, Side A.

Disk #335
Print Shop Graphics
Was previously Disk 151, Side B.

Disk #336
Print Shop Graphics
Was previously Disk 152, Side A.

Disk #337
Print Shop Graphics
Was previously Disk 152, Side B.

Disk #338
Print Shop Utilities
PRINT SHOP PRINTER - Print all of the graphics on a Print Shop picture disk. Prints more than 50 pictures per page. Lists their names underneath each picture
SHOP TOOL - Converts individual Print Shop pictures to a .PSF file which can then be sent over the modem
PACK TOOL - Takes several .PSF files and packs them into a single .PAC file
Also included on this disk are five .PAC files of Print Shop graphics

Disk #339
Icon Shop
Get more out of your Print Shop graphics with this program. Similar to the icon editor within Print Shop, but much more advanced. Includes support for joystick, mouse, and Koala Pad. Documentation included.

Disk #340
Koala Utilities
KOALA SHOW/MAGIC LANTERN - Koala slide show programs
130XE SLIDE SHOW - Koala slide show that uses the extra memory located within the 130XE
KOALA PAD/ATARI ARTIST PICTURE PRINTER - Prints Koala and Micropainter pictures to any Epson, Gemini, NEC, or Prowriter printer
OMNIPRINT - Koala picture printer to any G: Device printer
QUICK DUMP - Simple Koala picture printer for Epson, Gemini, NEC, and Prowriter printers
ATARI TOUCH TABLET VALUES

Pinball Games
Includes The Atari Jail, Polygons, Top Speed, and T-Ball.

Disk #388
Pinball Games
Includes Black Hole, Reactor Five, and Dr. Boom.

Disk #389
Pinball Games
Includes Death Zone, Pinball Monster, and Golden Gate.

Disk #390
Pinball Games
Includes Paul's Dr. Waco, Meta-Pin Soft Pinball, and Starship.

Disk #391
Pinball Games
Includes CHQ Ball, Nintendo Pinball, and Top Speed 2.

Educational

Disk #175
My Second Alphabet
Teaches alphabet recognition to your children. Shows a picture of a letter and an object that begins with that letter. The child must type in the letter that the object begins with.

Disk #176
My Third Alphabet
Teaches alphabet recognition to young children. Shows a picture of an object and the child must type in the letter that the object's begins with.

Disk #177
Educational Games
LETTER AND NUMBER IDENTIFICATION - Teaches preschoolers how to identify letters and numbers
ATARI TICK TOCK - Teaches youngsters how to tell time
ASTRO MATH - Teaches simple math, in a fun, arcade game setting. For 1 player or 2 players simultaneously
K TYPE - Typing program
LEARN TO READ - Quiz program which lets the child choose the best missing word from the sentence
PICTURE MATHS - Game which teaches simple math

Disk #178
Birth of Civilization
Gives a series of quizzes on ancient history, including Pre Historical life, Ancient Mesopotamia, Egypt, India, and China.

Disk #179
Synonyms and Antonyms
8 lessons designed to teach synonyms and antonyms to approximately 160 words. For grades 3-4. Teaches spellings of words as well.

Disk #180
Read & Spell
Teaches young children the basics of the English grammar system. Recommended for children in grads 1-3. 18 different lessons on the disk.

Disk #181
Capitalization
8 lessons designed to teach the grammatic rules associated with capitalization.

Disk #182
Science Lessons
Gives science lessons on light, hardness of minerals, dinosaurs, planets, plants, and outer space. Presents material in an interesting setting, using simple animation. Includes quizzes to test on material learned. For grades 2-4.

Disk #311
Math Programs
TRIGONOMETRIC FUNCTIONS - Computes answers to trigonometric functions
GRAPHIT1 - Plots points on a graph
GRAPHIT2 - Quiz on finding slope and intercept points
GRAPHIT3 - Quadratic equations
GRAPHIT4 - Slopes and graphs
GRAPHIT5 - Graphing program
POLYNOMIAL PLOTTER - Plots polynomials with a variety of options
QUADRATIC EQUATIONS - Drills on solving quadratic equations
MATH ROUTINES PACKAGE - Solves for greatest common denominator, linear interpolation, quadradratic roots, simultaneous equations, permutations & combinations, and prime factors of integers
CORRELATION COEFFICIENTS - Calculates the coefficient of correlation, along with their respective sums, from a set of data points
POWERS OF TWO - Displays a given range of the set of the powers of two
T-TEST FOR TWO INDEPENDENT VARIABLES - Calculates value of t for given data values
PRIMESETC - Includes a prime number generator, bubble sort routine, and a cube root solver
GEOMETRY - Lesson in geometry on the sine, cosine, and tangent functions
GEOMETRIC AREA - Quizzes on finding the srea of squares, rectangles, parallelograms, triangles, and circles

Disk #312
Math Programs
MATHMAN - Drills simple multiplication with animation
KEVIN'S MULTIPLICATION PRACTICE - Drills multiplication with emphasis on carrying
BIGNUM - Converts numbers into spoken English
MATH DRILL, MATH KIDS, MATH TIME, MAGIC BLACKBOARD, ADDITION, SUBTRACTION - Math drills
OLD MACDONALD - Counting and matching game for children
MEET THE ROMANS - A contest for two players on converting Roman numerals to Arabic numbers

Disk #313
Math Programs
MATH FUN, MATH TEACHER - Math drills
MATH WARS - Type in the answer to the addition problem before it reaches the bottom
COUNTING - Addition and subtraction with fun graphics
MULTIPLYING FRACTIONS - Drill on multiplying fractions. Includes cancelling and reducing
KNOW YOUR MONEY - Drills students on the math of dollars and cents. Three levels to choose from

MATH RACE - For 1 or 2 players
PERCENTAGE HELPER - Tutor and drill for finding percentages of other numbers
NEGATIVE NUMBER OPERATIONS - Basic math operations tutor and drill, dealing with both positive and negative numbers
NUMBERS - Flashes the names of the numbers 1-100, along with the numbers themselves
COUNT, COUNTING - Counting games
PRE-SCHOOL MATH - Addition, subtraction, and counting

Disk #314
Math Programs
SHOOT 'EM UP MATH - Addition and subtraction presented within a shoot 'em up arcade game
MATHEMATIC TIC-TAC-TOE - Tic-Tac-Toe for two players. Before placing an 'X' or 'O', the player must successfully answer a math problem. Levels ranging from easy to HARD!
NUMBER LINE - Drills of the basics of the number line
SLIDE - An addition and subtraction board game for 2-4 players
COUNT THE SQUARES - Counting game
NUMBER MACHINE - Put a number into the machine, and it converts it to another number. Try to figure out the pattern
VIDEO MATH FLASHCARDS - Math drill for youngsters. Addition through division
TELLTIME - Quizzes on telling time with the hour and minute hands

Disk #315
Math Programs
7 different programs designed to drill students in addition, subtraction, multiplication, and division
FRACTION SYMBOLS - Graphically illustrates the concept of fractions, then drills on them

Disk #316
Math Programs
CLOCK - Tell time, tutor and drill
MAKING CHANGE - Drills on conversions of cents to individual coins
NUMBER HUNT - For 1-2 players, use the joystick to find the correct answer
PLACE VALUE - Tutors and drills on place value
MORE OR LESS - Evaluate two numbers, and tell whether one is more or less than the other. Includes negative a decimal numbers
MULTIPLICATION TUTOR - 6 lessons designed to teach multiplication. Includes a quiz section
BINGO TIMES TABLE PRACTICE - Give the program a right answer, and a spot on the Bingo card will be covered
ANIMATH - Answer the addition problem correctly, and the gorilla dances. Otherwise, he falls in the stream
SIGNIFICANT FIGURES DRILL

Disk #317
TANK MATH - Drill for addition, subtraction, multiplication, and division. Includes a tutor for helping out for wrong answers. Documentation included
SUPERFROGS FUNSPELLER - Drills alphabet and spelling in a series of fun-to-play games. Documentation included

Disk #318
English Programs
ALPHABET TRAIN - Load the letters from the train onto your truck to spell a given word
COMPOUND WORDS - Gives you two words, which you must form a compound word with
OPPOSITE - Computer gives you a word, and you must type in its opposite

Miscellaneous

Disk #66
Multiscanner
A utility written in machine language that can modify Koala, MicroPainter, Graphics 9, 10 and 11 pictures. Several Koala pictures included.

Disk #130
DOS 2.5 Tutorial
Explains most functions of DOS 2.5 in clear, plain English. If any part of DOS 2.5 confuses you, this disk is a must!

Disk #145
Adventurer's Companion
Program shows explicit hints for the following adventure games: Dark Crystal, Cutthroats, Ghost Town, Hitchhiker's Guide to the Galaxy, Infidel, Mask of the Sun, Mystery Funhouse, Mission Asteroid, Pyramid of Doom, Pirate Adventure, Witness, and Deadline. **Warning**: These hints will tell you exactly how to solve each game. Use only if you are extremely desperate!

Disk #155
Geneology
Store information about your family tree, then retreive it with ease. Supports the recording of divorces and the lack of children in families. Includes the option to print pedigree charts and family group sheets.

Disk #160
Spanish
Refresh your Spanish with this set of 9 lessons designed towards learning to read and write Spanish.

Disk #341/342
Calorie & Nutrition Guide
Keeps track of your daily caloric and nutritional intake. Has a database of over 500 food items. Statistics take your age, weight, and sex into consideration. Documentation included.

Disk #343
'C' Compiler
The best 'C' compiler available on the Atari. Knowledge of the 'C' programming language is required.

Disk #344
Football Analyzer NFL
Predict upcoming football games by inputting data from previous wins and losses into the computer. NFL Version. Requires 64K.

Disk #345
Football Analyzer College
Predict upcoming football games by inputting data from previous wins and losses into the computer. College Version. Requires 64K.

Disk #346
Paper Airplane Construction Set
Prints out unusual and different paper airplanes. Illustrated documentation included. Epson or compatible printer required.

Disk #347
Bowling Assistant
Keeps track of leagues, scores, and players. Documentation included. Requires 64K.

Disk #348
Infocom Hints
omplete walk-thru documentation for the following Infocom games: Deadline, Enchanter, The Hitchhiker's Guide to the Galaxy, Infidel, Planetfall, Seastalker, and Starcross.

Disk #349
Infocom Hints
Complete walk-thru documentation for the following Infocom games: Suspended, Witness, Zork I, Zork II, and Zork III.

More New Public Domain Disks available in our '92 Catalog

By placing an order, you will automatically receive our next catalog.

Ordering Information

Credit Card Orders Call Toll Free: (800) 347-6760

Phone Orders $20.00 Minimum

Please have your credit card information and the items you wish to order ready when you call. If you have questions before you order, please call our Customer Service Department at (209) 432-3072. Most orders will be processed and shipped within 2-3 working days. If your order is going to be delayed for an extended amount of time, you will be notified by telephone or postcard. Our order lines are open Monday through Friday 8:00 am to 6:00 pm PST and Saturday 10:00 am to 5:00 pm PST.
